

► Specifications

Size: DN15-DN25

Material: PMMA

Standard: DIN

Connection: Socket

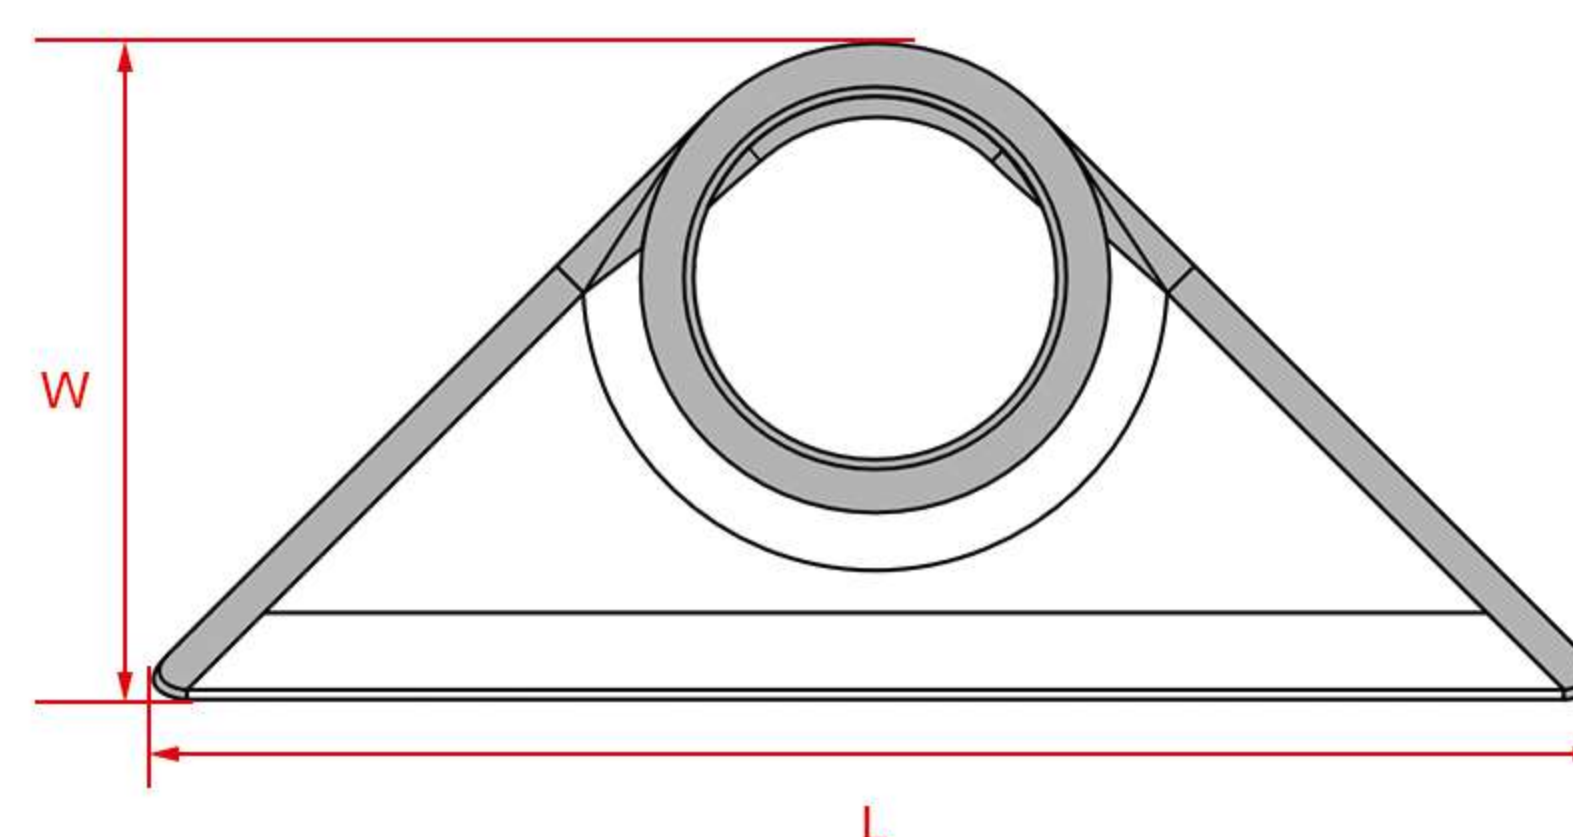

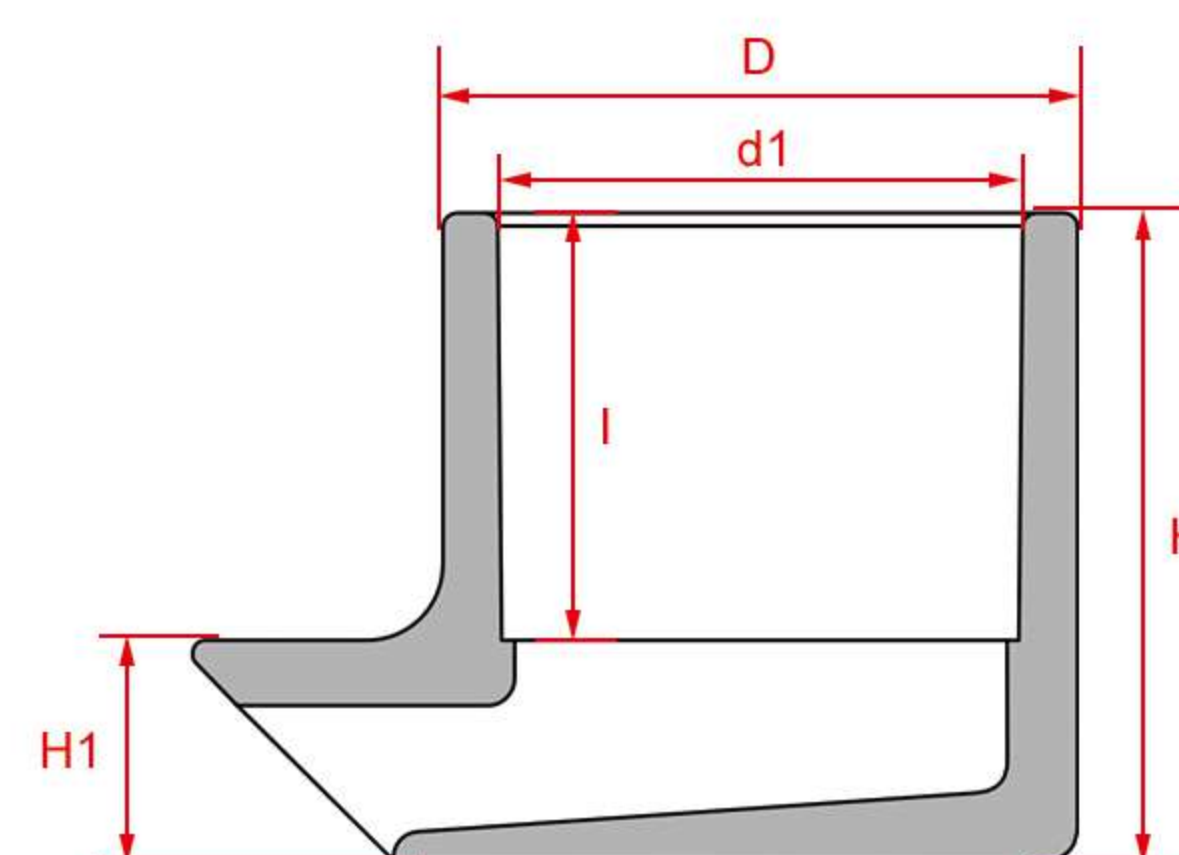

► Product Features

1. Using Japan's **Mitsubishi optical grade** acrylic raw materials, **the light transmittance is as high as 93%**.

2. The special **design of the water outlet is up and down**, which can effectively prevent the water from turning up and blowing the bottom better.

3. The water outlet **fan reaches 90 degrees**, the diffusion area is wider, and the diversion effect is obvious.

4. Can be widely used in aquarium, experiment, demonstration, breeding and other industries, safe and reliable.
